

Computerised Accounting for Business Qualifications

IAB Level 1

Award in Computerised Accounting for Business

Introduces the basics of using commercially available accounting software to set up a computerised accounting system, process business transactions and produce reports.

IAB Level 3

Certificate in Computerised Accounting for Business

This qualification takes the learners through both the manual and computerised aspects of preparing management reports and financial statements.

IAB Level 2

Certificate in Computerised Accounting for Business

Suitable for learners who have some experience of working with Sage or other accounting software, but little prior experience of manual, double-entry bookkeeping.

All study counts towards your CPD

Computerised Accounting for Business Qualifications are a progression or alternative route from our core bookkeeping qualifications and start to look at aspects of accounting.

Bookkeeping content is included and serves as a revision or a reminder of your bookkeeping foundation learning.

These qualifications are standalone and applicable to individuals who want knowledge of management accounts rather than purely bookkeeping.
